

WaterGurus Filtration Solutions

Whole Of House And Undersink Filtration Systems - fact sheet

Benefits

Every year around 80,000 tones of poisonous and reactive chemicals, including sulfuric acid, hydrogen peroxide, copper sulphate, hydrofluorosilicic acid, sodium hypochlorite, lie, aluminium sulphate, liquefied chlorine, ammonia and another 50 assorted compounds are added to Australia's drinking water. WaterGurus Water Filtration Solutions remove harmful contaminants and provide clean safe water to your whole home and family.

- Filtered Water provides the healthiest water for the development of children's immune systems, as well as their mental and physical growth
- Water filters reduce the risk of gastrointestinal disease by more than 33 percent by removing cryptosporidium and Giardia from drinking water
- Bottled water is costly and unnecessary
- Water filters offer the last line of defence between the body and more than 2,100 toxins that have been separately identified and found in drinking water samples.
- Drinking clean filtered water protects the body from disease and leads to overall greater health

According to the EPA, lead in drinking water contributes to 480,000 cases of learning disorders in children each year

It is especially important for pregnant women to drink pure water as lead in drinking water can cause severe birth defects.

Technical

- Nominal 0.5-micron rating
- Lead reduction through 2000 gallons
- VOC and MTBE reduction: 99.95% reduction of Cryptosporidium, Giardia, Entamoeba and Toxoplasma cysts
- Premium high capacity chlorine taste & odor reduction through more than 20,000 gallons
- Enhanced dirt holding capacity
- Made in the USA

VIC – High Drive, Dandenong
NSW – Gosford, Central Coast
QLD – 23 Windsor Road, Nambour
WA – 3/57 Inspiration Drive, Wangara
NZ – 137 Armagh Street, Christchurch
